# 1 List of Definitions and Abbreviations

- MOA - Municipality of Anchorage

## 2 Introduction

The bsdInspect web application provides Inspection Requests submission.

## 3 Questions

Still have some outstanding questions.

- - Break table column over two rows?

## 4 Examples

Series of useful L<sup>A</sup>T<sub>E</sub>X markup. Need to break out to separate examples.tex file.

### 4.1 Escaping < and > Symbols

To get \$<\$ or \$>\$ just wrap the symbols in \$ for math mode.

### 4.2 Enumerate

1. DNR - Alaska State Department of Natural Resources
  - HI - Historical Index, not maintained since 1982
  - LE - Land Estate, maintained by SGU
  - ME - Mineral Estate, maintaind by SGU
2. Alaska State Surveys
  - ASBLT - As-Built Survey
  - ASCS - Cadastral Survey

### 4.3 Comments

**COMMENTS** Comment — *Sean Weems, Spring 2003*

We should get the **COMMENTS** column searchable via the landrecords application before we do much anything else – shouldn't be too hard.

*Errata: Plats spanning multiple sections*

A few anomalies can be observed in the **AKPLATS** table. Specifically plats exist that span multiple sections. Since the table only has a single column, **SCODE**, that accepts a single section code, SGU (Status Graphics Unit) has handled this problem by entering multiple rows in the table, each with a different section that point to the same plat or file. Multiple section plats are indicated by setting the **TCODE** column to the value 37, and making an appropriate notation like *Section 24-25-26-27* in the **REMARKS** column.

[FIXME: Perhaps the **SCODE** column should accept an array of sections?]

### 4.4 Footnotes

Some footnotes here ?? for an example. Yet another 2 example.

## 4.6 Verbatim

“The verbatim environment is a paragraph-making environment that gets  $\text{\LaTeX}$  to print exactly what you type in. It turns  $\text{\LaTeX}$  into a typewriter with carriage returns and blanks having the same effect that they would on a typewriter.”<sup>1</sup>

```
\begin{verbatim}
  text
\end{verbatim}
```

[FIXME: Need to determine how to escape the verbatim markup for display above.]
