Comments

> `COMMENTS` Comment — *Sean Weems, Spring 2003*
> We should get the `COMMENTS` column searchable via the landrecords application before we do much anything else – shouldn't be too hard.

> *Errata: Plats spanning multiple sections*
> A few anomalies can be observed in the `AKPLATS` table. Specifically plats exist that span multiple sections. Since the table only has a single column, `SCODE`, that accepts a single section code, SGU (Status Graphics Unit) has handled this problem by entering multiple rows in the table, each with a different section that point to the same plat or file. Multiple section plats are indicated by setting the `TCODE` column to the value 37, and making an appropriate notation like *Section 24-25-26-27* in the `REMARKS` column.
> [FIXME: Perhaps the `SCODE` column should accept an array of sections?]

## Version Number

It is often desirable to add a version number to a document for tracking or revision control. CVS or Subversion users can use the `rcs` or `svnInfo` packages for inline version information.
